Summary:

Final-year Information Technology student with a strong interest in Python, JavaScript, and React.js, experienced in building responsive and user-focused applications with real-time API integration. Proficient in problem-solving, Git, and collaborative development, with a keen interest in developing scalable and impactful technology solutions. Comfortable working both independently and in team environments, with a focus on delivering practical and efficient solutions.

Skills:

- **Programming Languages & Web Technologies:** Python, HTML, CSS, JavaScript
- **Libraries & Frameworks:** React.js, Node.js
- **Tools & Platforms:** Git, GitHub, VS Code
- **Soft Skills:** Problem-solving mindset, Clear communication, Teamwork and Leadership

Experience:

Web Development Intern

07/2025 - 08/2025

- Designed and implemented a responsive, modern landing page, optimizing for both desktop and mobile.
- Created and launched a portfolio website, showcasing projects and professional skills.
- Developed and deployed a fully functional web app Calculator, enhancing user interactivity and design functionality.

Projects:

Liver Disease Prediction Using Optimised Feature Selection and Data Balancing Techniques

- Developed a liver disease prediction system using the LightGBM model based on the analysis of actual patient data by enhancing model precision with suitable preprocessing.
- Applied techniques like feature selection (RFE) and data balancing (SMOTE-ENN) to make the model more reliable and reduce bias in predictions.
- Developed a web application using Flask where users can enter health details and get prediction results in real time.
- Added model explainability using SHAP to show how different input features affect the prediction outcome.

Weather Web App | [Live](#) | [Source](#)

- Built a responsive weather application using HTML5, CSS3, and JavaScript.
- Integrated the OpenWeatherMap API to retrieve and display real-time weather information based on user search.
- View upcoming weather predictions for up to 5 days.

To-Do List Web App | [Live](#) | [Source](#)

- Crafted an interactive and responsive task manager web app that allows users to add, manage, and remove daily tasks using modern JavaScript for dynamic behaviour.
- Used local storage to store Tasks and preferences persistently between sessions.
- Organized Tasks as cards in a responsive grid layout, providing better visual organization and hierarchy compared to traditional lists.

Certification:

- Oracle Cloud Infrastructure Certified Generative AI Professional - [Oracle University](#)
- Introduction to Machine Learning - [NPTEL](#)

Education:

TKR College of Engineering And Technology

Meerpet, Telangana

Bachelor of Technology in Information Technology

Nov 2022 – May 2026

- **CGPA : 8.23 / 10.0**
